DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 11-12 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. "A computer readable medium" is not disclosed in the specification or drawings.

Allowable Subject Matter

3. Claims 1-3, 5, and 9-10 are allowed.

4. The following is an examiner's statement of reasons for allowance:

Applicant's independent claims 1, 9, and 11 are each drawn to a device, method, and a process for preventing one-time only calls. Applicant's invention comprises determining whether a calling number is registered in a telephone directory database; monitoring a calling time between the arrival of the call and an issuance of a calling tone; connect the call immediately before issuing the calling tone if the calling number is

not registered in the telephone directory database and announcing a prearranged recorded message; and issuing one or more of the calling tone before connecting the call when the calling number is registered as a predetermined type of caller in the telephone directory database, wherein recording message response time between the arrival of the call and the announcement of a recorded message is stored for each name registered in the telephone directory database, and an incoming recorded message response time is set for an incoming call by referring to the stored recorded message response time corresponding to the calling number when the calling number is registered in the telephone directory database. This particular combination of elements claimed as Applicant's invention is neither taught nor suggested by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
